PROFILE

Full-stack developer working with TypeScript, React, Node.js, and PostgreSQL. Independently developed Kelevo, a deployed transportation-management application. Earlier experience includes logistics IT support and internal tools. Seeking a full-stack or backend role in a collaborative engineering team.

EXPERIENCE & PROJECTS

Software Developer & Founder

Kelevo — independent software product | Oct 2025 – Present

- Developed React interfaces and Node.js/Express APIs for dispatch, fleet management, document intake, and owner-operator settlements.
- Modeled logistics workflows in PostgreSQL with Prisma, organization-scoped services, role-based access, and explicit lifecycle transition rules.
- Implemented rate-confirmation OCR import, Stripe subscription billing, and generated PDF settlement statements.
- Maintained Docker/Linux deployments and automated checks for lint, types, tests, and shared domain contracts.

IT Support & Internal Tools Developer

Iron Wing Dispatching | Jan 2021 – Sep 2025

- Provided day-to-day technology support for dispatch and logistics operations.
- Built operational dashboards and ELD-integrated live-tracking workflows.
- Connected commercial TMS platforms through APIs and automated repetitive business processes.

OTR Truck Driver → Truck Dispatcher

Varsan Trucking | Apr 2016 – Nov 2020

- Drove long-haul freight through Jul 2017, then coordinated drivers, brokers, loads, schedules, and operational exceptions from Aug 2017 to Nov 2020.

SKILLS

Development: TypeScript, JavaScript, React, Node.js, Express, REST APIs

Data & access: PostgreSQL, Prisma, Zod, authentication, role-based access

Tools & delivery: Git, automated testing, GitHub Actions, Docker, Linux, AWS, Cloudflare

EDUCATION

The Odin Project — Full-Stack JavaScript curriculum (self-directed study).
