SELECTED ENGINEERING IMPACT

End-to-end delivery

Built a SaaS product from concept through launch.

Business software

Built workflows for real logistics operations.

Full-stack ownership

Owned backend, frontend, database, APIs and deployment.

Production mindset

Used testing, CI/CD and structured delivery practices.

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Software Engineer Kelevo - Transportation Management SaaS

2024 - Present

- Founded and engineered a SaaS platform for trucking companies, covering dispatching, fleet management, document workflows and operational control.
- Designed and implemented the application architecture, relational database model, backend APIs, frontend user experience and deployment process.
- Built authentication, role-based access, document import, operational workflows and reporting-oriented features for logistics users.
- Applied first-hand industry experience to translate business problems into practical software requirements.
- Managed product roadmap, implementation and release preparation as the sole software engineer.

Truck Dispatcher Iron Wing Dispatching

2024 - 2025

- Coordinated with brokers, drivers and logistics teams across dispatch workflows.
- Converted operational trucking knowledge into software requirements for Kelevo.

Owner & Manager Nick Kalas Winery

2011 - 2022

- Managed business operations, production planning, equipment, seasonal workers and customer relationships.

FEATURED PROJECT

Kelevo Transportation Management System

A SaaS platform for small and mid-sized trucking operations, bringing dispatching, fleet management, document processing and workflow automation into a single operational system.

- Built around real logistics entities such as loads, drivers, fleet assets, dispatch lifecycle and document-heavy operations.
- Designed to move carriers from spreadsheets and manual coordination to structured, auditable workflows.

ENGINEERING PROFILE

- Full-stack delivery
- API design
- Database design
- SaaS development
- Cloud deployment
- CI/CD
- Product ownership

TECHNICAL SKILLS

LANGUAGES

TypeScript JavaScript Python

FRONTEND

React HTML5 Tailwind CSS

BACKEND

Node.js Express REST APIs
